개념 설명

매쓰프로 개념 중3-2 · 15쪽 · 5. 삼각비 - 04 삼각형과 사각형의 넓이

사각형의 넓이

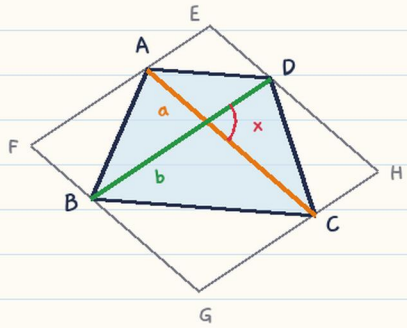

(1) 평행사변형

$$\square ABCD = 2\triangle ABC = 2 \times \frac{1}{2}ab\sin x$$

$$S = ab\sin x$$

(2) 사각형

$$\square ABCD = \frac{1}{2}\square EFGH = \frac{1}{2}ab\sin x$$

$$S = \frac{1}{2}ab\sin x$$

(평행사변형) $S = ab\sin(180° - x)$

(사각형) $S = \frac{1}{2}ab\sin(180° - x)$
